Author(s)	Title of the Paper	Pages
Maxime Redondin, Laurent Bouillaut, and Dimitri Daucher	EM Approach for Weibull Analysis in a Strongly Censored Data Context – Application to Road Markings	333-342
Tae-Jin Yang	Comparative Study on the Performance Attributes of NHPP Software Reliability Model based on Weibull Family Distribution	343-353
Tyler D. Ridder and Ram M. Narayanan	Operational Reliability Metric to Characterize Radar Detection Performability	354-363
S. Anbazhagan and Bhuvanewari Ramachandran	Ameliorating Vertically Bundled Electricity Price Prediction Exclusively from ICMLP Network	364-370
Manjushree D. Laddha, Varsha T. Lokare, Arvind W. Kiwelekar, and Laxman D. Netak	Performance Analysis of the Impact of Technical Skills on Employability	371-378
Megha Chhabra, Manoj Kumar Shukla, and Kiran Kumar Ravulakollu	Intelligent Optimization of Latent Fingerprint Image Segmentation using Stacked Convolutional Autoencoder	379-393
Sonia F. Al-Najjar and Wael W. Al-Azhari	Review of Aerodynamic Design Configurations for Wind Mitigation in High-Rise Buildings: Two Cases from Amman	394-403
Ch Anoosha and B.T.Krishna	Non-Linear Frequency Modulated Radar Echo Signal Cancellation using Interrupted Sampling Repeater Jamming	404-410
