Author(s)	Title of the Paper	Pages
Chen Li, Junjun Zheng, Hiroyuki Okamura, and Tadashi Dohi	Hierarchical Bayesian Parameter Estimation of Queueing Systems using Utilization Data	307-316
Hongjing Deng, Xuan Zhang, Jiahao Jiang, Jie Wang, and Hexiang Huang	Privacy Protection of Personal Education Information on Blockchain	317-328
Jiahao Zhang, Junjun Zheng, Hiroyuki Okamura, and Tadashi Dohi	Variance-Based Sensitivity Analysis for Markov Models using Moment Approximation	329-337
Chin-Yuan Huang, Ming-Chin Yang, I-Ming Chen, and Wen-Chang Hsu	Modeling Consumer Adoption Intention of an AI-Powered Health Chatbot in Taiwan: An Empirical Perspective	338-349
Chengjie Xu, Dongcheng Li, W. Eric Wong, and Man Zhao	Service Caching Strategy based on Edge Computing and Reinforcement Learning	350-358
Ying Huang, Linglin Gong, Jianguo Zhang, Haiwei Fan, and Yizhuo Zhang	Review of Key Elements Identification and Robustness Analysis of Power Grid based on Complex Network Theory	359-368
Assia Brek and Zizette Boufaïda	Enhancing Information Extraction Process in Job Recommendation using Semantic Technology	369-379
Roop Preet Kaur, Anshu Sharma, Inderpal Singh, and Rahul Malhotra	Deep Learning-Based Pneumonia Recognition from Chest X-Ray Images	380-386
