VOLUME 22 NUMBER 11 NOVEMBER 2026

International Journal of Performability Engineering

SCOPE OF THE JOURNAL

International Journal of Performability Engineering **(IJPE)** is a refereed international journal of the 21st Century and invites papers on theoretical as well as practical aspects of quality, reliability, security, safety, and maintainability of systems (software and hardware), products, and services.

The topics of interest include, but are not limited to:

- System (software and hardware) quality assurance: verification, validation, and testing; debugging; metrics and measurement; security and safety evaluation; intrusion detection and prevention; fault-tolerant and disaster recovery; dependable computing, survivability, and resilience; data protection and privacy; vulnerability discovery; penetration analysis; malware detection and analysis; regulatory and standards compliance; monitoring and auditing
- Quality engineering and management: off-line and on-line quality control; statistical/engineering process control; quality planning, improvement, and management; ISO certification; Six Sigma
- Reliability engineering: estimation and prediction methodologies; data analysis and modeling; system reliability design and optimization; reliability/life testing
- Maintenance engineering: replacement, preventive, and predictive; condition-based maintenance strategies and models; corrective maintenance; maintainability design and availability optimization; computerized maintenance management systems and e-maintenance framework
- Risk perception and analysis: quantitative and probabilistic risk assessment; risk minimization, management, and governance
- Product design and optimization: product life cycle management; product warranty; cost analysis; environmental regulations and directives
- Industry best practices: application and empirical evaluation; reviews; supporting tools and automation

Performability engineering is a holistic interdisciplinary approach to optimally engineer dependable and sustainable systems, products, and services.

This journal is covered by Scopus (Elsevier's widely referred Bibliographic Database of the world), IET Inspec, Google Scholar, DBLP, and ProQuest for citation and indexing.

Volume 22 - Number 11 - November 2026 International Journal of Performability Engineering pp. 621-694

Online ISSN: 2993-8341
Print ISSN: 0973-1318

International Journal of Performability Engineering

Published by Totem Publisher Inc., Plano, Texas, U. S. A.

VOLUME 22 NUMBER 11 NOVEMBER 2026

Editors-in-Chief:
Franz Wotawa, Graz University of Technology, Austria
Suprasad Amari, BAE Systems, U.S.A.
Junhua Ding, University of North Texas, U.S.A.

Founding Editor-in-Chief:
Krishna B. Misra, RAMS Consultants, India

Assistant Editor-in-Chief:
Zhenyu Chen, Nanjing University, China

Regional Editors :
Andrea Bondavalli, University of Florence, Italy
Tadashi Dohi, Hiroshima University, Japan
Lance Fiondella, University of Massachusetts Dartmouth, U.S.A.
D. Richard Kuhn, Virginia Tech, U.S.A.
Shaoying Liu, East China Normal University, China
Ivan Machado, Federal University of Bahia, Brazil
Manuel Núñez, Complutense University of Madrid, Spain
Auri Vincenzi, University of Porto, Portugal
