International Journal of Performability Engineering, Vol. 22, No. 11, November 2026

Author(s)	Title of the Paper	Pages
Shahad Mnati, Ammar Zakzouk, Hasan Hasan, and Fatima Jasim	Feature-Constrained Adversarial Robustness Evaluation and Defense for Machine Learning-Based Network Intrusion Detection Systems	621-632
Pawan Kumar Goel, Danish Ather, and Golnoosh Manteghi	Trusted and Explainable AI for Secure Cloud and Edge Infrastructures	633-643
Sushil Bhardwaj, Neeraj Kumar Sharma, Tejinder Pal Singh Brar, and Indu Sharma	LLM-Assisted Software Fault Detection and Automated Bug Repair Using Mutation Testing: An Experimental Evaluation of Prompting and Test-Feedback Techniques	644-654
Nidhi Gupta, Neeta Singh, and Aarti Gautam Dinker	Deep Quantile Regression Neural Network with GAOA and Multifactor Graphical-Based Authentication for Integrated Data Security in Smart City Applications	655-668
Davinder Singh, Inderpal Singh, Anurag Sharma, Karuna, and Gagandeep Singh	Quantum-Resistant, PUF-Anchored Three-Party Authentication and Key Agreement for Blockchain-Enabled IoMT	669-680
Vaibhav Ranjan and Potukuchi Raghu Vamsi	Hybrid Tabular-Graph Representation Learning Approach for Improving Fraud Detection in Ethereum Network	681-694
